

Converting

1. Can you convert these decimals into fractions and percentages- remember percentage is out of 100!

Can you simplify any of the fractions?

0.41	0.24		0.1	0.8
0.06	0.9		0.22	0.2
0.25	0.3		0.7	0.03
0.15	0.52		0.57	0.19

2. Now practise adding and subtracting decimals. Choose a pair and then add them, when subtracting remember to put the larger decimal on the top!
3. Go back to the decimals at the top and order them from smallest to largest.
