

Science

Why do we have a skeleton? What would happen if you didn't have one? Discuss this with the people at home.

Skeleton Functions (Activity 1) – With an adult, read through the information on the functions of the skeleton. Discuss and verbally answer the onscreen questions.

Protect, Support, Move (Activity 2) – Follow the instructions to colour code and label the bones of the body, according to their function.

Types of Skeletons (Activity 3) – Open 'Types of Skeleton Info' to find out about different types of skeletons. Then open 'Types of Skeleton Sorting' and choose which sorting activity you would like to complete.

R.E.

Christians believe Jesus teaches people about what makes us really happy.

Read the version of the Happiness sayings of Jesus in the R.E. activity sheets. These sayings are about being 'blessed' (happy). They contain advice on how Christians should live their lives.

Look at the eight cards, each one giving a simplified version of the saying of Jesus. Try and talk to the people at home about what they mean,.

Have a go at making a collage or picture to show some of the things Jesus said made people happy and things that make them happy/sad.

Would anything be the same?

Computing

This week please continue with the coding lessons here:

https://studio.code.org/s/express-2019?section_id=2793409

and complete lessons 3-4

Remember to watch any explanation videos.

D&T

Packaging

Get out your design from last week. What do you need to think about before you start making your final product?

Before you start making look at the questions on the activity sheets.

Gather the materials you need to make your packaging. I know you might not have cardboard at home but perhaps you might have things you can use in your cardboard recycling!

D&T

Sandwiches

You have now designed, made and eaten your sandwich. What did it taste like? Smell like? Look like? What texture did it have?

Look at the sandwich design that you did. How useful was your design when you were making your sandwich? Look at and think about the questions on the activity sheets.

Complete your own evaluation of your sandwich either using one of the activity sheets or your own design.
