

What is it?

You need to identify three living things.

Each one must be in a different category, e.g. a plant, an animal and an insect would be three different categories. You could find these living things for real, when you are out and about or in your garden, in a book, on the internet or even in your home!

Once you have three living things: Complete the following for each one.

1. What is it? Name it.
2. Where did you find it?
3. Write down where you found it or where you might find it.
4. Add details about the habitat conditions such as shady, light, damp, dry.
5. What does it look like? Draw a quick sketch, with colour add labels.
6. Jot down details like how many legs or wings, maybe take a photo.
7. Try to use the Key Vocabulary from **MRS NERG 2**.

TOP TIP!

Do your research and try to add as much detail as you can. Be creative in your presentation.
