

Geography - Volcanoes—journey of lava and Earthquakes

In Chapter 3 Michael travels across the Atlantic Ocean. They pass Cape Verde as they travel towards South America. Cape Verde has a lot of Volcanic activity, find out how this happens in the videos below.

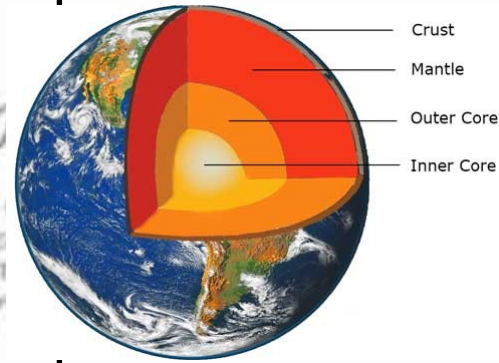

Task 1: Watch the two videos, both give a description of the earth's layers.

Note: If you have an atlas you will find a similar sketches in in there to compare to.

Task 2: In your workbook make a labelled sketch of the earth's layers.

PSHE — Tolerance

Michael has travelled the world, visiting many different countries. As he arrives in each country he will experience a range of cultures, religions and beliefs. We know of many different religions and beliefs, often we will have our own opinions about these and we need to be tolerant and respectful of any differences. So what is tolerance?

Michael played football with children in Brazil, many of which would have different religious beliefs to Michael and his family.

Task 1: Read the story **Scuttleball, Soccer for Ants** by Pedro Pablo Sacristan.

Task 2: Complete the questions at the bottom of the story into your workbook.

Science—Grouping and Sorting?

To understand and find out more scientists often *group and sort living things* by finding any similarities and differences between them.

Task 1: Find a selection of different shapes, sizes and coloured leaves. (If possible, 6 different types).

Task 2: Try to identify the names of the trees your leaves came from.

Task 3: Have a go at making a simple chart that groups and sorts your leaves by following a similar pattern as shown in the help sheet: **START HERE**.

Computing — Media

This week we will be using SeeSaw to share information we have created.

Task: Research a sporting event of your choice, then create some notes in your workbook about what is happening in that sport at the moment, then type up and share them on-line (SeeSaw) with the group, also share to the Blog.

See: **F1_Example** for ideas on content and amount.
