Use the information on your graphs to answer these questions:

1. Which months have the highest temperature?

2. Which month has the lowest temperature?

3. What is the average temperature for the year?

You can work this out by adding up all 12 temperatures and then dividing the total by 12. You can use a calculator!

4. Which month has the most rainfall?

5. Which month is the driest?

6. How much rainfall is there in a whole year?

7. What is the difference in the amount of rainfall between January and July?

8. What is the difference in the amount of rainfall between March and September?

9. Which month do you think would be the best to visit a tropical rainforest and why?

10. Which month do you think would be the worst to visit a tropical rainforest and why?
