

The Life Cycle of Flowering Plants

Mini Project

All flowering plants go through the same stages of the life cycle.

The main stages are germination, growing and flowering, pollination, fertilisation and seed dispersal.

Can you design and create a way to represent the stages of the life cycle of a flowering plant?

You could:

- Draw the stages on a paper plate, using arrows to show the order.
- Make a poster to show the different stages.
- Create a book with one stage on each page.
- Write about what happens at each stage.
- Make a PowerPoint with one stage on each slide.
- Or come up with your own idea!
