

# TEETH AND MOUTH

Before starting this task you should wash your hands!

**Task 1:** Using a mirror, have a look at your teeth; notice the different shapes and sizes. Run your finger along the top edge of your teeth, top and bottom, note how they feel as you move around.

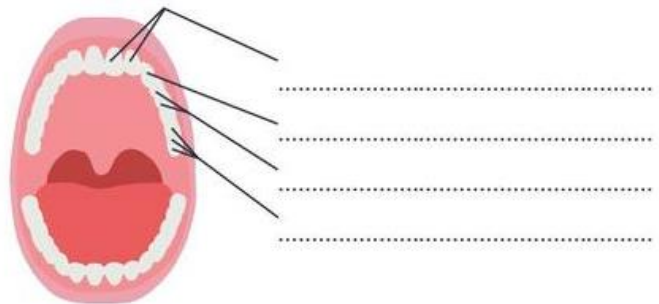

You have 4 different types of teeth in your mouth, all of which do a different job, these are incisor, canine, premolar and molar.

**Task 2:** Research these and identify them in your mouth.

After looking and feeling your teeth make notes about each type.

After looking and feeling your teeth make notes about each type.

## Incisor

## Canine

## Premolar

## Molar
