

Mission To Mars!

Here is your challenge Year 5's. The first thing to remember is you don't have to print this pack out. It is designed for you to work from the screen!

Instructions

Part One:

First read the 'Fact or Fiction' cards. On each card there are three statements. Two are false and one of the statements is true. Work out which are true and which are false. Don't guess. Be a researcher. Use books or the internet. Record the true fact in your journal. You are going to need this information.

Part Two:

You are astronauts, in a rocket orbiting Mars. You are planning to go down to the surface for an 8 hour mission.

Open up the picture card document and decide which six objects you would take with you to Mars. In your journals draw a picture of what you will take and explain why you chose these things. You will need to research how some of them work to help you make the decision.

Part Three:

Using the facts from part one, some photos, and the equipment Photos and your choices from part two, make a poster about your mission to Mars.
