

Shape Game: Names of Shapes

You need:

- this board;
- counters for each player;
- a die.

Here are lots of shapes with different numbers of sides.

Roll a die. However many spots you get, you've got to find a shape with that number of sides.

For example, 1 is a circle, 2 is a semi-circle.

Place a counter on the shape you choose. At the end, the player with the most covered shapes is the winner.

Square	Isosceles Triangle	Hexagon	Circle	Pentagon	Semi-circle
Oval	Pentagon	Semi-circle	Equilateral Triangle	Rectangle	Hexagon
Scalene Triangle	Hexagon	Pentagon	Kite	Semi-circle	Circle
Semi-circle	Rhombus	Oval	Pentagon	Hexagon	Right-angled Triangle
Pentagon	Semi-circle	Triangle	Hexagon	Circle	Trapezium
