

LO: Compare and order 4-digit numbers

Date:

**Practise**

Fill in the circle using  $<$ ,  $>$  or  $=$

Circle the smallest amount.

Two thousand, three hundred and ninety seven      3,792

6,000 + 400 + 50 + 6      6,455

9 thousands, 2 hundreds and 6 ones      9,602

Complete the statements.

1,985  $>$  .....

4,203  $<$  4,000 + ..... + 4

### Reasoning

4)

I am thinking of a number. It is greater than 3,000 but smaller than 5,000

The digits add up to 15.  
What could the number be?

Write down as many possibilities as you can.

The difference between the largest and smallest digit is 6- how many numbers do you now have?

### Problem Solving

- 5) Use digit cards 1 to 5 to complete the comparisons:

$$564\boxed{\phantom{0}} < \boxed{\phantom{0}}73\boxed{\phantom{0}}$$

$$2\boxed{\phantom{0}}38 > 23\boxed{\phantom{0}}5$$

You can only use each digit once.

- 6) /a. Which statement is incorrect?

$$15,000 + 700 + 60 + 9 > \text{Fifteen thousands, four hundreds and six tens}$$

10,204

>

Twenty thousand,  
eleven tens =  $20,000 + 100 + 19$   
and nine ones

- 8)

Explain why.
